DETAILED ACTION

Reissue Applications

The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Gallup et al. (5,524,439). See **18** for filling member, **22** for air vent, **16** for cover member, **30** for peltier element, **52** for the fan, **32** for an air temperature controlling device positioned between the fan and the air vent. See fig. 1 and continuation of air channel **20** for the groove being adjacent the sitting side.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gallup et al. in view of Vigo (2,782,834). Gallup et al. discloses all of the limitations of the claim except for the

Art Unit: 3749

groove including side walls and a bottom wall. Vigo discloses the presence of a groove including side walls and a bottom wall. See figs. 3 and 4. Hence, one skilled in the art would find it obvious to modify the heating system of Gallup et al. to include the groove including side walls and a bottom wall of Vigo for the purpose of better stability.
